About me

I am a dedicated full-stack developer with a passion for crafting seamless web solutions from frontend to backend. My enthusiasm for technology extends beyond traditional web development, as I am also deeply interested in exploring the exciting possibilities of machine learning. My goal is to combine my coding skills with machine learning expertise to create innovative and intelligent software solutions that push the boundaries of what's possible in the digital world.

Area of Interests

Machine Learning, Blockchain technology, UI/UX design & startups

Projects

- **Developed E-commerce website:**

Successfully replicated Fidelity's login page with precision using HTML and CSS. Meticulously developed a pixel-perfect clone, showcasing attention to detail and front-end expertise.

- **Developed Portfolio Website:**

Designed and developed a personal portfolio website using HTML and CSS. Showcasing my skills and projects, the site reflects creativity, responsiveness, and a strong grasp of front-end web development.

- **Designed Instagram Page:**

Designed an Instagram clone with Figma, focusing on intuitive UI/UX, responsive layouts, and collaborative design, resulting in a visually captivating project.

Skills

Full-stack Development

Successfully conceptualized, designed, and launched a dynamic e-commerce website, showcasing my proficiency in web development and online business strategy.

Languages

C, C++, JAVA (basics)

UI/UX

Proficiently designed Instagram page using Figma, demonstrating strong graphic design skills and a keen eye for brand aesthetics.

Data Structure and Algorithm (in progress)

Proficient in fundamental data structures and algorithms, with a basic understanding of their applications in problem-solving.

Education

Bangalore Institute of Technology,

Bachelor of Engineering in Information Science and Engineering

2021-2025

CGPA - 8.133
